## Select the preferred service

The ‘Ekahi Diabetes Management Program is a team based approach to diabetes care that connects your patients with the right resources at the right time to efficiently and effectively get their A1c to goal. Our team includes nurse case managers, clinical pharmacists, behavioral health specialists, registered dietitians, certified diabetes educators, and social workers.

Your patients can expect to develop a personalized care plan that combines both one-on-one and group education sessions to help them get and keep their diabetes controlled and avoid long-term consequences of diabetes such as dialysis and kidney disease, blindness, and neuropathy. Your patient can continue to utilize our services for as long as needed.
